

What Sets Us Apart

With nearly 450 lawyers across our five-state footprint, Frost Brown Todd offers a deep, talented roster of legal professionals. Committed to our clients, we leverage technical, industry, and legal knowledge and hands-on experience to serve a diverse client base, from global multinationals to small, entrepreneurial companies. Our client teams integrate that powerful network of legal talent and business experience to provide innovative and comprehensive services across our regional platform.

Frost Brown Todd focuses on delivering to clients what they report needing the most: sound legal counsel, responsive service, concise communication and an eye toward being as efficient in our representation as possible. We favor a lean staffing model in which the likely needs of a project are considered at the outset. Many of our projects are handled by a single lawyer, who becomes intimately familiar with the facts and laws relevant to the project. This approach reduces costs and avoids potential for duplicative work. In some projects, a threshold staffing assessment indicates that more than one attorney will be needed and a team of lawyers must be assembled. Our team includes qualified associates, paralegals and project assistants who can capably handle work requiring different levels of expertise. All matters are overseen by the relationship attorney or team leader to assure the highest standards of work product quality and strict adherence to technical requirements.

FBT believes that all clients are firm clients. At the same time, we encourage our attorneys to be passionate about our clients' businesses and their success. This guides our decisions to focus on doing what is in the best interests of our clients, to spend time understanding the complexities of the clients' businesses and industries and to be accessible to clients as their needs dictate.
